PAST WORKS

Jitter (jitter.video) – Software Graphics Engineer

Feb. 23 – Mar. 26

- State of the art Web Rendering pipeline (100x speedup, using cache and smart pipelining)
- Lead the Wasm integration (GIF exporter 20x speedup, 2D path simplifier, easings...)
- Video Frame Extraction (10x export speedup for files having MP4s), added audio support
- All exporters on the Web (MP4, WebM, GIF and Lottie)

Worked in a team of ~15, communication was key for increased bandwidth

EPITA – Teaching assistant

Sep. 21 – Feb. 23

Selected to teach 4th-year students C, C++, Java and JavaScript

In a team of ~45, we were preparing subjects and exercises for over 800 students

PROJECTS

QRCode Generator – Rust

288 stars & 250k downloads

Implementation of ISO 18004 with focus on CPU optimizations and Wasm

This library is ~10x faster than the standard Rust QRCode library

Maison Bundle – Web (NextJS)

~1.2M€ gross revenue

The collection of french DIY ebooks since 2024.

- 250 partnerships leading to 50 000 sales and happy customers.
- Dashboards, monitoring, availability and admin CMS.
- Infra following best practices allowing up to 5k concurrent users loading the site

Other projects – Mostly Web / Apps

Just love to build random websites/apps:

- Moonvas (a moodboard canvas using Durable Objects)
- FeatGuessr (a trivia game using graph database)
- Social Account Manager (a simplified browser where each tab lives in isolation)
